## SUMMARY

Final-year B.Tech student in Electronics and Communication Engineering (ECE), graduating in May 2027, building multi-tenant and real-time applications using Next.js, Node.js, and MongoDB. Reduced API latency by 25% during an internship and won IEEE Tech Spark 2.0. Seeking full-time Software Engineer opportunities starting in 2027.

## EDUCATION

**Bachelor of Technology (B.Tech), Electronics and Communication Engineering** — Expected May 2027

Centurion University of Technology and Management — CGPA: 8.4 / 10.0

**Coursework:** Data Structures and Algorithms, OOP, DBMS, Operating Systems, Computer Networks

## EXPERIENCE

**Software Engineering Intern, Full-Stack Platforms** | **Zetheta Algorithms (Remote)** — May 2026 – Jul 2026

- **Role:** Full-stack intern owning Next.js performance, secure Node.js REST APIs, and MongoDB query tuning.
- Added API response caching and route-level code splitting in Next.js, cutting render delay by 30% (Lighthouse-verified).
- Refactored MongoDB aggregation pipelines and added server-side cursor pagination, reducing API latency by 25%.
- Designed and built Node.js REST APIs secured with JWT and role-based access control (RBAC) for admin and user roles.
- Reviewed pull requests, wrote unit tests, and closed bugs through Git and GitHub Actions CI/CD in Agile/Scrum sprints.

**C Programming Intern** | **CTTC, Bhubaneswar** — Jun 2024 – Jul 2024

- Studied C fundamentals and data structures: pointers, loops, dynamic memory allocation, functions, and file handling.
- Built an Employee Management System in C with file-based storage and CRUD operations on employee records.
- Organized the program into separate functions for adding, viewing, updating, and deleting employee records.

## PROJECTS

**CartSphere – Multi-Vendor E-Commerce SaaS** | GitHub | Live Demo — Jun 2025 – Jul 2025

**Tech:** Next.js, TypeScript, Node.js, MongoDB Atlas, Auth.js, OAuth 2.0, Razorpay, Stripe, Socket.IO

- **Problem:** Independent sellers needed isolated stores on one marketplace, with unverified sellers blocked from listing.
- **Design:** Multi-tenant modular monolith on Next.js API routes (Catalog, Orders, Payments, Chat modules); role-scoped REST API serving Admin, Vendor, and Customer dashboards; every query scoped to the owning vendor.
- **Built:** Three-step seller approval (GST, documents, product sign-off), Auth.js with Google OAuth and OTP, Razorpay and Stripe, Socket.IO order chat; deployed on Vercel with a CI/CD pipeline.

**RYDEX – Real-Time Ride-Hailing Platform** | GitHub | Live Demo — Oct 2025 – Jan 2026

**Tech:** Next.js, Node.js, MongoDB, WebSocket, Socket.IO, JWT, Google OAuth 2.0, Zego Cloud

- **Problem:** Needed live ride tracking and fast driver matching without constant polling, plus verified driver identity.
- **Design:** Layered architecture with separate Rider, Driver, and Admin domains sharing auth and payments; stateless JWT sessions for horizontal scaling; WebSocket channel for GPS; ride lifecycle as discrete state transitions.
- **Built:** Dijkstra's shortest-path routing and driver matching over a 15,000+ node spatial graph, Google OAuth 2.0, RBAC, dual OTP checkpoints (pickup and drop), and Zego Cloud video calls with driver video KYC; deployed on Vercel with a CI/CD pipeline.

**Resume Genie – AI Career Toolkit** | GitHub | Live Demo — Jul 2026 – Aug 2026

**Tech:** Python, Streamlit, LangChain, Groq API (Llama 3.3 70B), PyPDF, ReportLab

- **Problem:** Resume tools often give vague advice or invent experience; this one uses only the user's real resume and job description.
- **Design:** Streamlit app; LangChain sends resume and job details to Llama 3.3 70B (Groq) with live streamed replies; PDFs cached.
- **Built:** Cover letter generator, job-description matcher, resume checker, career coach chat, PDF download; API keys secured.

## TECHNICAL SKILLS

**Languages:** JavaScript, TypeScript, Python, SQL, C

**Frontend:** React, Next.js, Redux Toolkit, Tailwind CSS, HTML/CSS

**Backend and Real-Time:** Node.js, Express.js, REST APIs, JWT, OAuth 2.0, RBAC, WebSockets, Socket.IO, Razorpay, Stripe

**AI and LLM:** LLMs, LangChain, Groq API, Prompt Engineering, Streamlit

**Databases:** MongoDB, MongoDB Atlas, Mongoose, Schema Design

**Cloud and DevOps:** AWS, Linux, GitHub Actions (CI/CD), Vercel, Git

## CERTIFICATIONS AND ACHIEVEMENTS

- **IEEE Tech Spark 2.0 Hackathon (2026), 1st of 50+ teams:** Edge-AI vehicle black box for live driving telemetry.
- **AWS Certified Cloud Practitioner** (2025) | **IBM Web Developer Certification** (2026)
